MICRO-DRAIN

OVERVIEW

Soap scum, hair, and other organic matter are often the cause of slow drains, sewer and septic backups, and also lead to pest problems and rancid odors. Using Micro-Drain on a regular basis in your home showers, sinks, and bathtub drains will help keep drains free of these problems. Micro-Drain is unlike other leading products that use toxic chemicals to burn through clogs and are harmful to pipes and septic systems. Micro-Drain uses naturally occurring bacteria to gently break down organic matter and keep water flowing freely.

Micro-Drain will not dissolve hair like other leading products, but will loosen the organic matter binding these clogs to help unclog drains. Other products are usually allowed a maximum of 10-15 minutes of dwell time before having to flush them so they do not do damage to pipes. We recommend leaving Micro-Drain to dwell overnight or as long as possible to work on problem drains without any worry of damaging pipes. Micro-Drain will also help enhance and keep sewer lines and septic tanks healthy.

APPEARANCE GREEN
FRAGRANCE FRESH
FORM LIQUID
SHELF LIFE 24 MO/U.O.C.
pH 6.8 - 7.8
EFFECTIVE pH RANGE 4.0 - 11.0
EFFECTIVE TEMPERATURE RANGE 5 - 50C

APPLICATIONS

- 1 Shower & Bathtub Drains
 - 2 Sink Drains
-

ADVANTAGES

- 1 Extensive shelf life
- 2 Prevent emergency blockages
- 3 Prevent odors
- 4 Enhance septic tank function

MICRO-DRAIN**

BACTERIAL TYPE

SEVEN STRAIN BACILLUS SPORE BLEND

ENZYME PRODUCTION

- 1 PROTEASE
- 2 AMYLASE
- 3 ESTERASE
- 4 UREASE
- 5 CELLULASE
- 6 XYLANASE
- 7 LIPASE

PACKAGING

Quarts

DIRECTIONS FOR USE

Application:

Pour 4-6 ounces of Micro-Drain down drain for 4-6 hours or overnight. This step can be repeated as necessary.
