MICRO-CLEAN
•PRODUCT BULLETIN•

Description

Greasy floors are slippery, dangerous and difficult to clean. **MICRO-CLEAN** contains bacteria and enzymes to jump start the attack on grease and oil, as well as targeted bacteria and organic compounds that complete the cleaning process. This approach results in a turn-key product that provides quick initial results with subsequent continuous cleaning and deodorizing. Chemical cleaners simply spread the slippery grease around, doing little to eliminate it. **MICRO-CLEAN** deep cleans, removing embedded residual grease and organics especially in porous tile, cracks, crevices, and corners. **MICRO-CLEAN** continues to work when washed down the drain, digesting grease and organics as it flows through the pipes into the sewer or septic system where the bacteria continue to remediate fats, oils, greases and other organic matter. **MICRO-CLEAN** contains no chlorine, phosphates, or other potentially harmful chemicals, and is safe for humans, animals, and the environment when used as instructed.

Applications

Restaurants – Food Preparation Areas – Cafeterias – Grocery Stores

Features and Benefits

- ① Degrades grease and organic buildup.
- ① No harsh chemicals.
- ① Excellent for drain maintenance.
- ① Great for hard to clean porous tile.
- ① No-rinse formulation.
- ① Eliminates odors.
- ① No harmful vapors.

How to Use

Dilute 4:1

- Step 1. Wipe up any spills and sweep floor.
- Step 2. Fill mop bucket with cool water.
- Step 3. Add 2-4 ounces of **MICRO-CLEAN** per gallon of water.
- Step 4. Using a clean mop, apply solution to floor.
- Step 5. Allow to air dry. Do Not Rinse.

MICRO-CLEAN

Typical Properties

Property	Value
Form:	Free flowing liquid
Color:	Natural
Fragrance:	Citrus
Bacterial Content	Proprietary blend of Bacillus spores
Nutrient Content	Biological nutrients, surfactants and stimulants

Safe Handling Information

Wear eye and skin protection. Wash hands after handling. Avoid discharge to natural waters. Small spillages can be washed away with large amounts of water. Large spillages, if contained, can be returned to container.

Waste Disposal Method: For disposal of aqueous surfactant solutions: Aerobic biological effective in treating aqueous solutions of surfactants. Removal efficiency will depend upon treatment plant conditions. As with any wastewater, consultation with local treatment plant staff is recommended (and may be required by law) before disposal. In typical activated sludge treatment systems, inlet concentrations below 50 mg/l have been treated without foaming problems.

Packaging

5 Gallon Pail
Other packaging available.

Storage

Store **MICRO-CLEAN** in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area. Do not freeze or heat above 110°F. Keep away from incompatible materials (See MSDS) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Keep away from children.

Warranty

The information presented is correct to the best of our knowledge; however, no warranty is expressed or implied other than the quality of the product described. No recommendation to infringe on any patented or proprietary procedures is intended. Each user of Micro Environmental Supply Inc. products should review this information and these recommendations to determine their relevance and applicability in the specific context in which the products are to be used.

MSDS

Micro Environmental Supply Inc. provides our customers with a product specific Material Safety Data Sheet (MSDS) to cover safe handling, storage, potential health effects, use and disposal information. Micro Environmental Supply Inc. strongly encourages our customers to thoroughly review the MSDS on our products and other materials prior to their use.
